

HOW TO TEXT

Simplicity is key for effective texting with a woman you've just met.

The Rules

- Send your first text the SAME DAY
 - Set up a date with your first message
 - Don't try to engage her in a conversation. The whole point of texting her is to set up a date.
-

Text Template

Hey (Name), it was good meeting you today. Let's grab a (coffee/drink) later this/next week, which day is good for you

Notes

- There's no '?' and that's intentional.
- It's better to find out which days she's free initially because otherwise if she isn't free on the day you asked for, you'll now have to "chase" her. "Uhhh Monday? Tuesday? Wednesday...."
- After getting a woman's number text your name right away. If you don't then add your name to the first message you send. "Hey X, this is X. It was good..."
